Ranking on Graph Data

In *Proceedings of the 23rd International Conference on Machine Learning*, 2006.

- Eq. (14): $\min_{\mathbf{f} \in \mathbb{R}^n}$ should be read as $\min_{\{\alpha_{ij}\}}$
- Eq. (19): \mathbf{E} should be read as E
- Eq. (21): This should be read as

$$P_{ij}^{(\eta)} = \begin{cases} 0 & \text{if } i = j \\ (1 - \eta)P_{ij} + \eta \frac{1}{n-1} & \text{if } i \neq j \text{ and } d^+(v_i) > 0 \\ \frac{1}{n-1} & \text{otherwise.} \end{cases}$$
